

Son Cao: Nugroup-related work May 11th 2018

Hardware work:

- Continue R&D Beam Induced Florescence monitor development
- Reported status at T2K pre-meeting

Software work:

- Working on neutrino event generators, NEUT
- Reported at some meetings
- Related topics

Work with Nugroup members:

- Paper editing with Ngoc, Van
- Some code check with Ha on Slack
- Discuss with Van & Nakaya-san on the next steps: oscillation analysis in T2K, ex. CPT check by comparing numu disappearance with numubar disappearance
- Work on hold: for Ngoc to join T2K. Need to be approved by IFIRSE director, Jean Tran Thanh Van. The final answer is not received yet; in the mean time, please

- Ha & Thanh: Please update your thesis writing regularly. Otherwise, we can't help. Also think more about your future after graduation.
- Minh: Thank you for your work. It's important for T2K.

Service work:

- Continue to take some Neutrino facility operation leader shift
- Scoring VSON students and some related work
- Multiple email exchange/info about the symposium: Ngoc, Truong, Van , please remember to submit abstract before June 1st
