# Large Hadron Collider

**~10 billion collisions per second  
~10 PB of data per second**

# Fast ML for Science

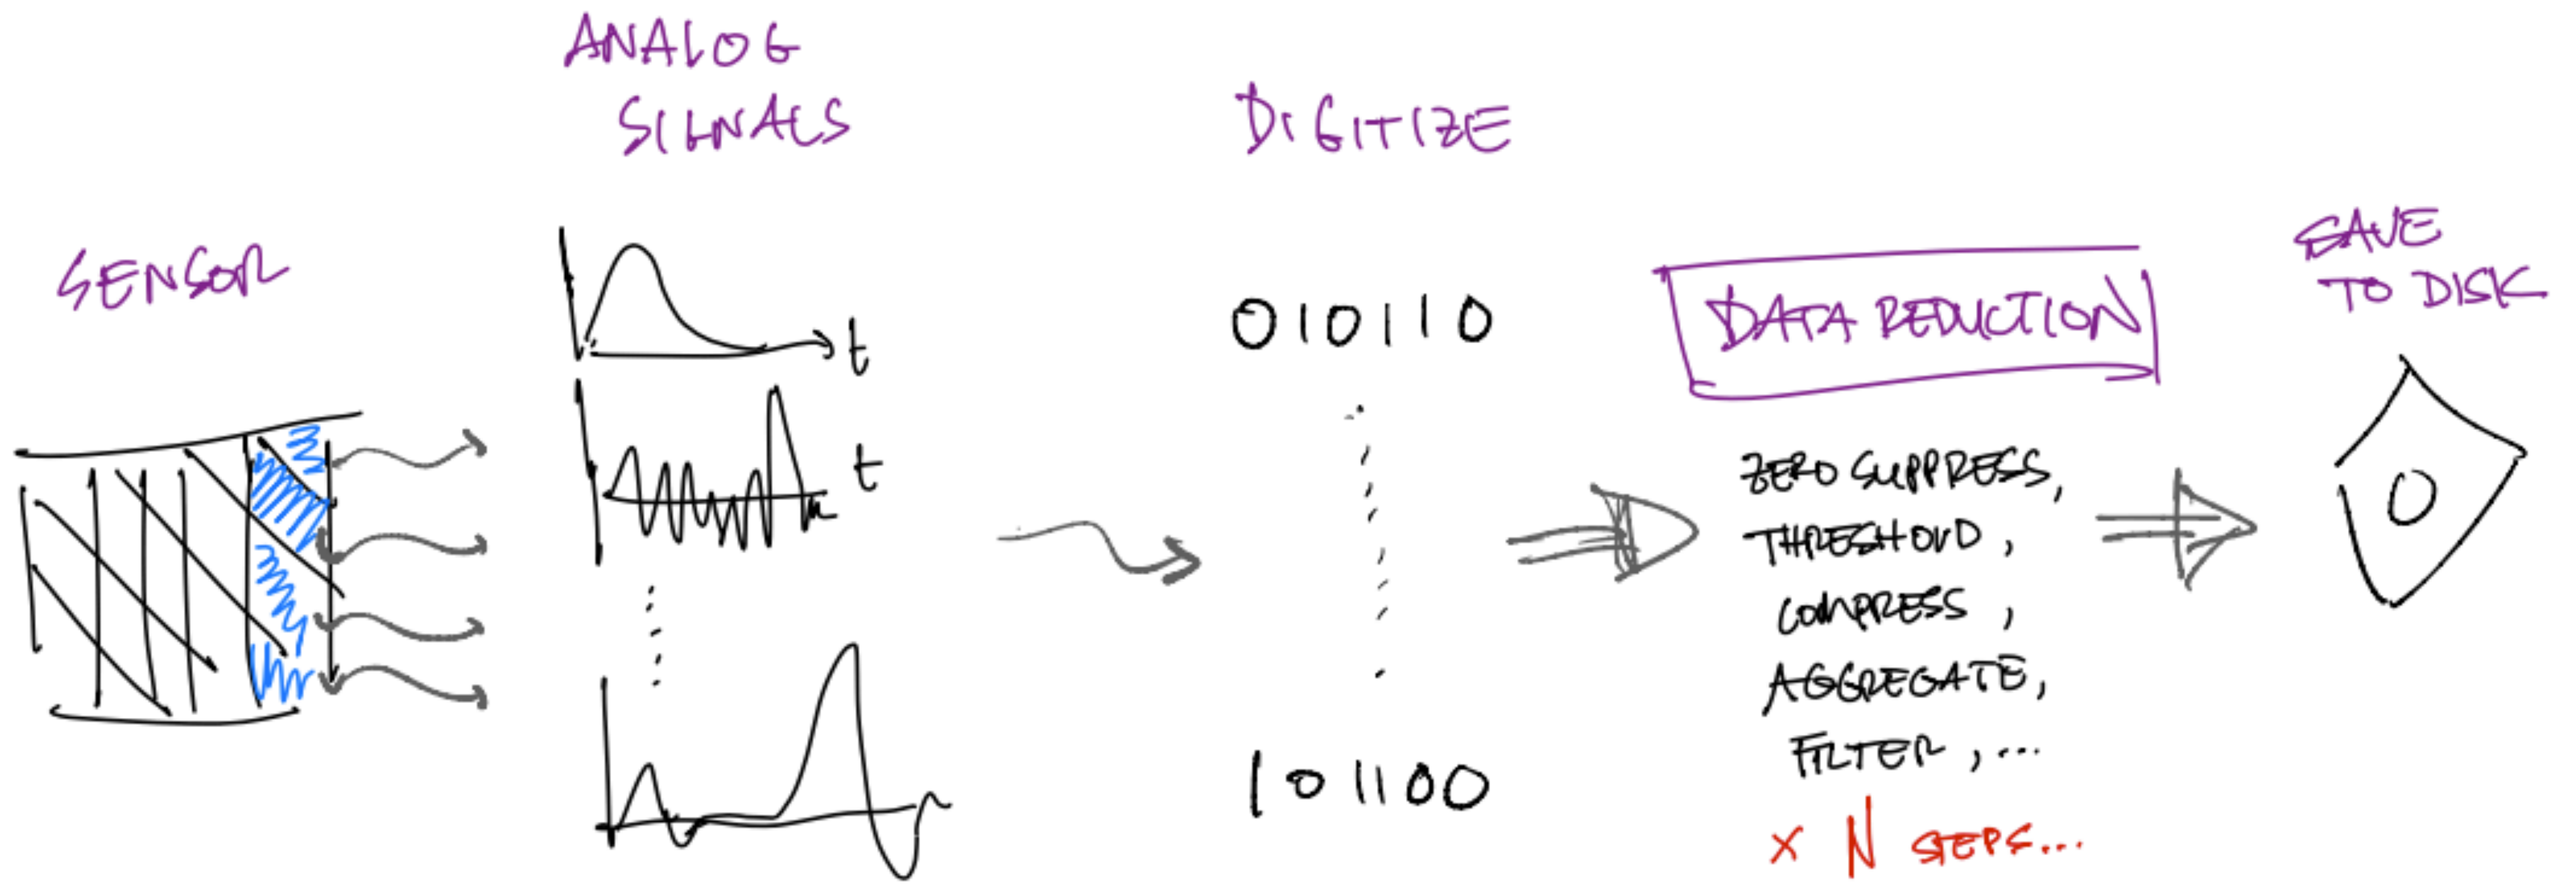

“

Scientific discoveries come from groundbreaking ideas and the capability to validate those ideas by testing nature at new scales—finer and more precise temporal and spatial resolution. This is leading to an explosion of data that must be interpreted, and ML is proving a powerful approach. The more efficiently we can test our hypotheses, the faster we can achieve discovery. To fully unleash the power of ML and accelerate discoveries, it is necessary to embed it into our scientific process, into our instruments and detectors.

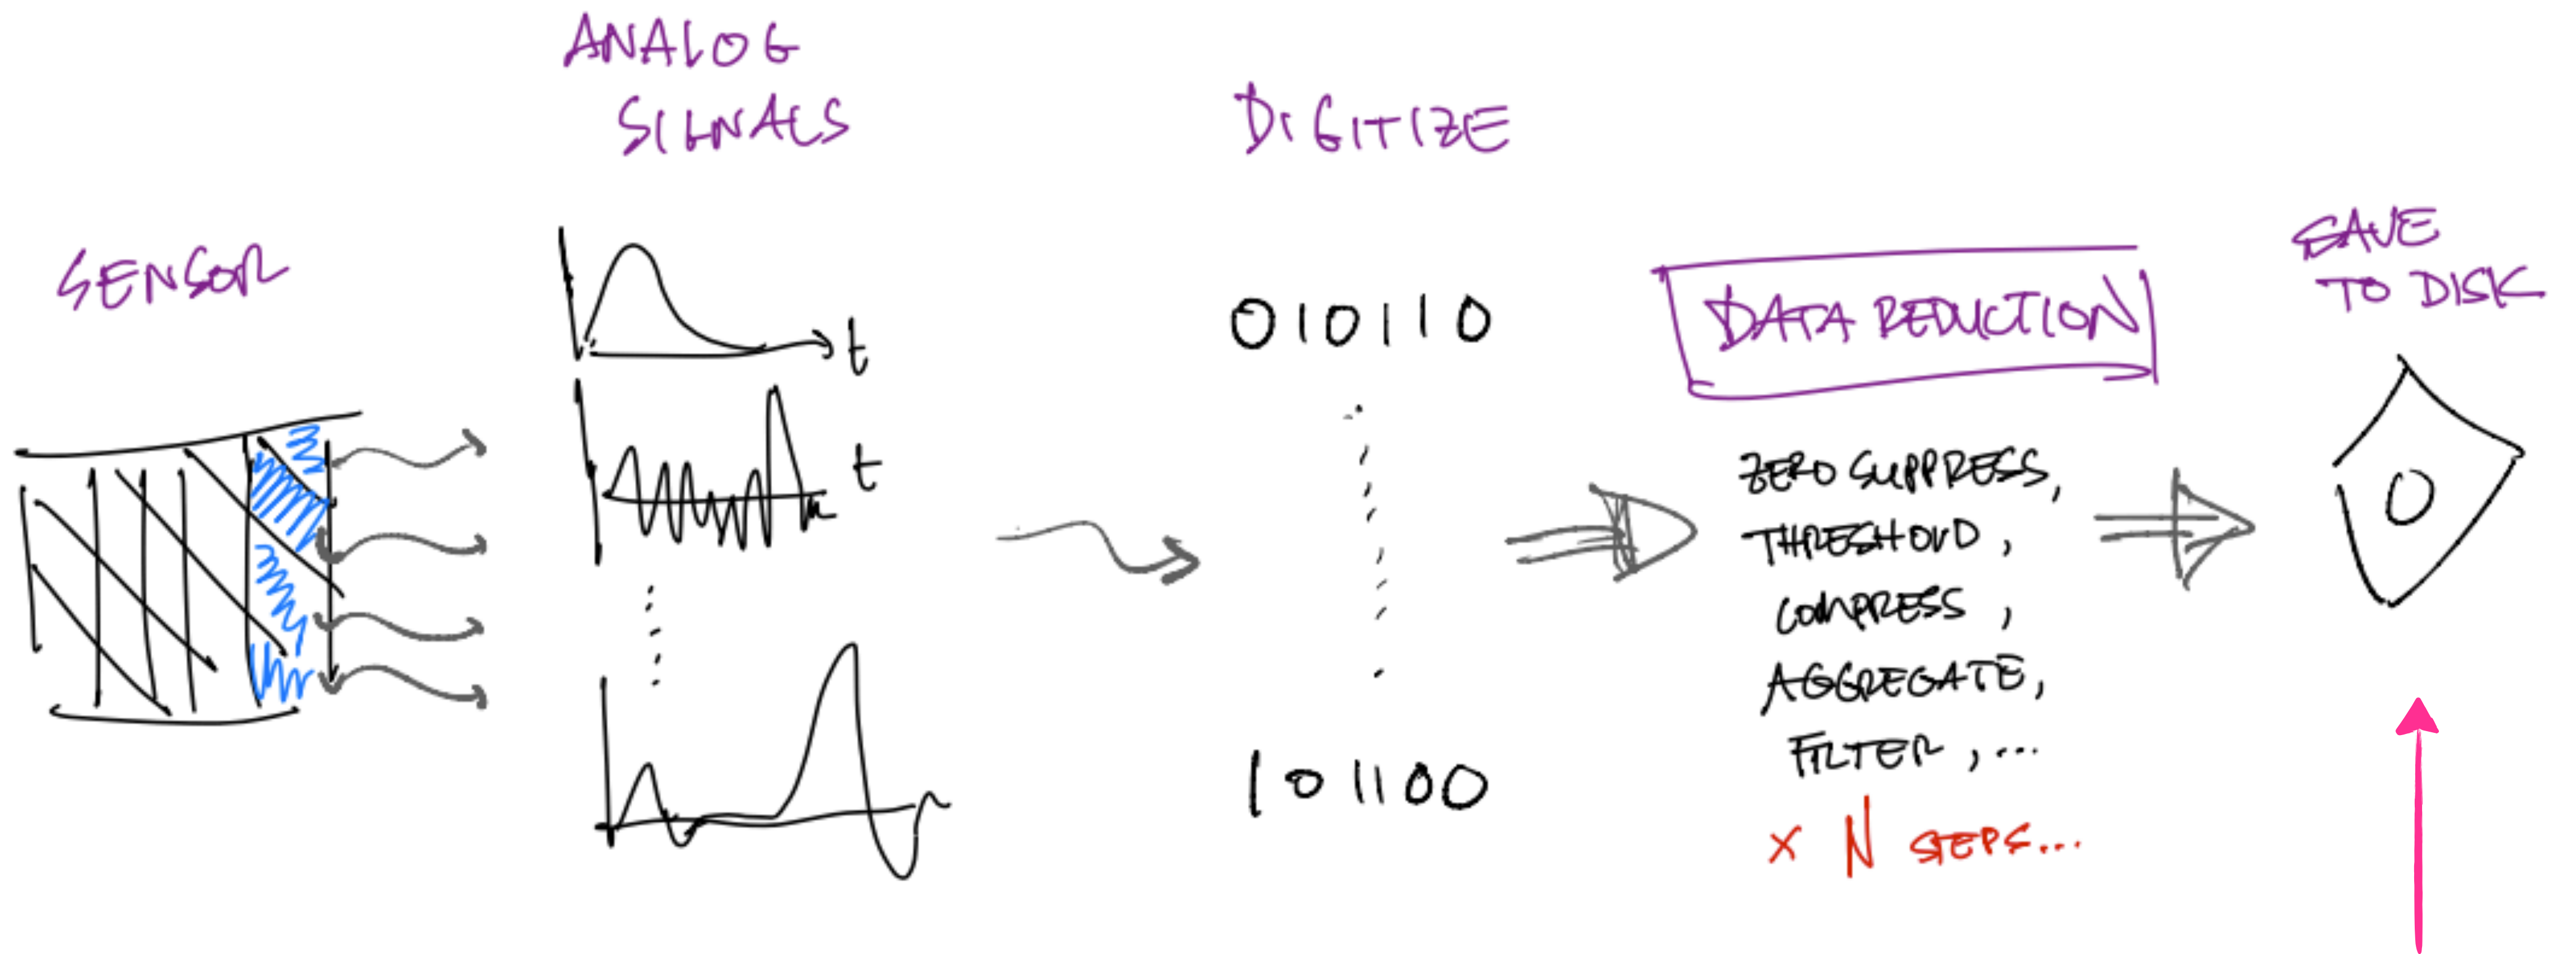

”

Applications and Techniques for Fast Machine Learning in Science

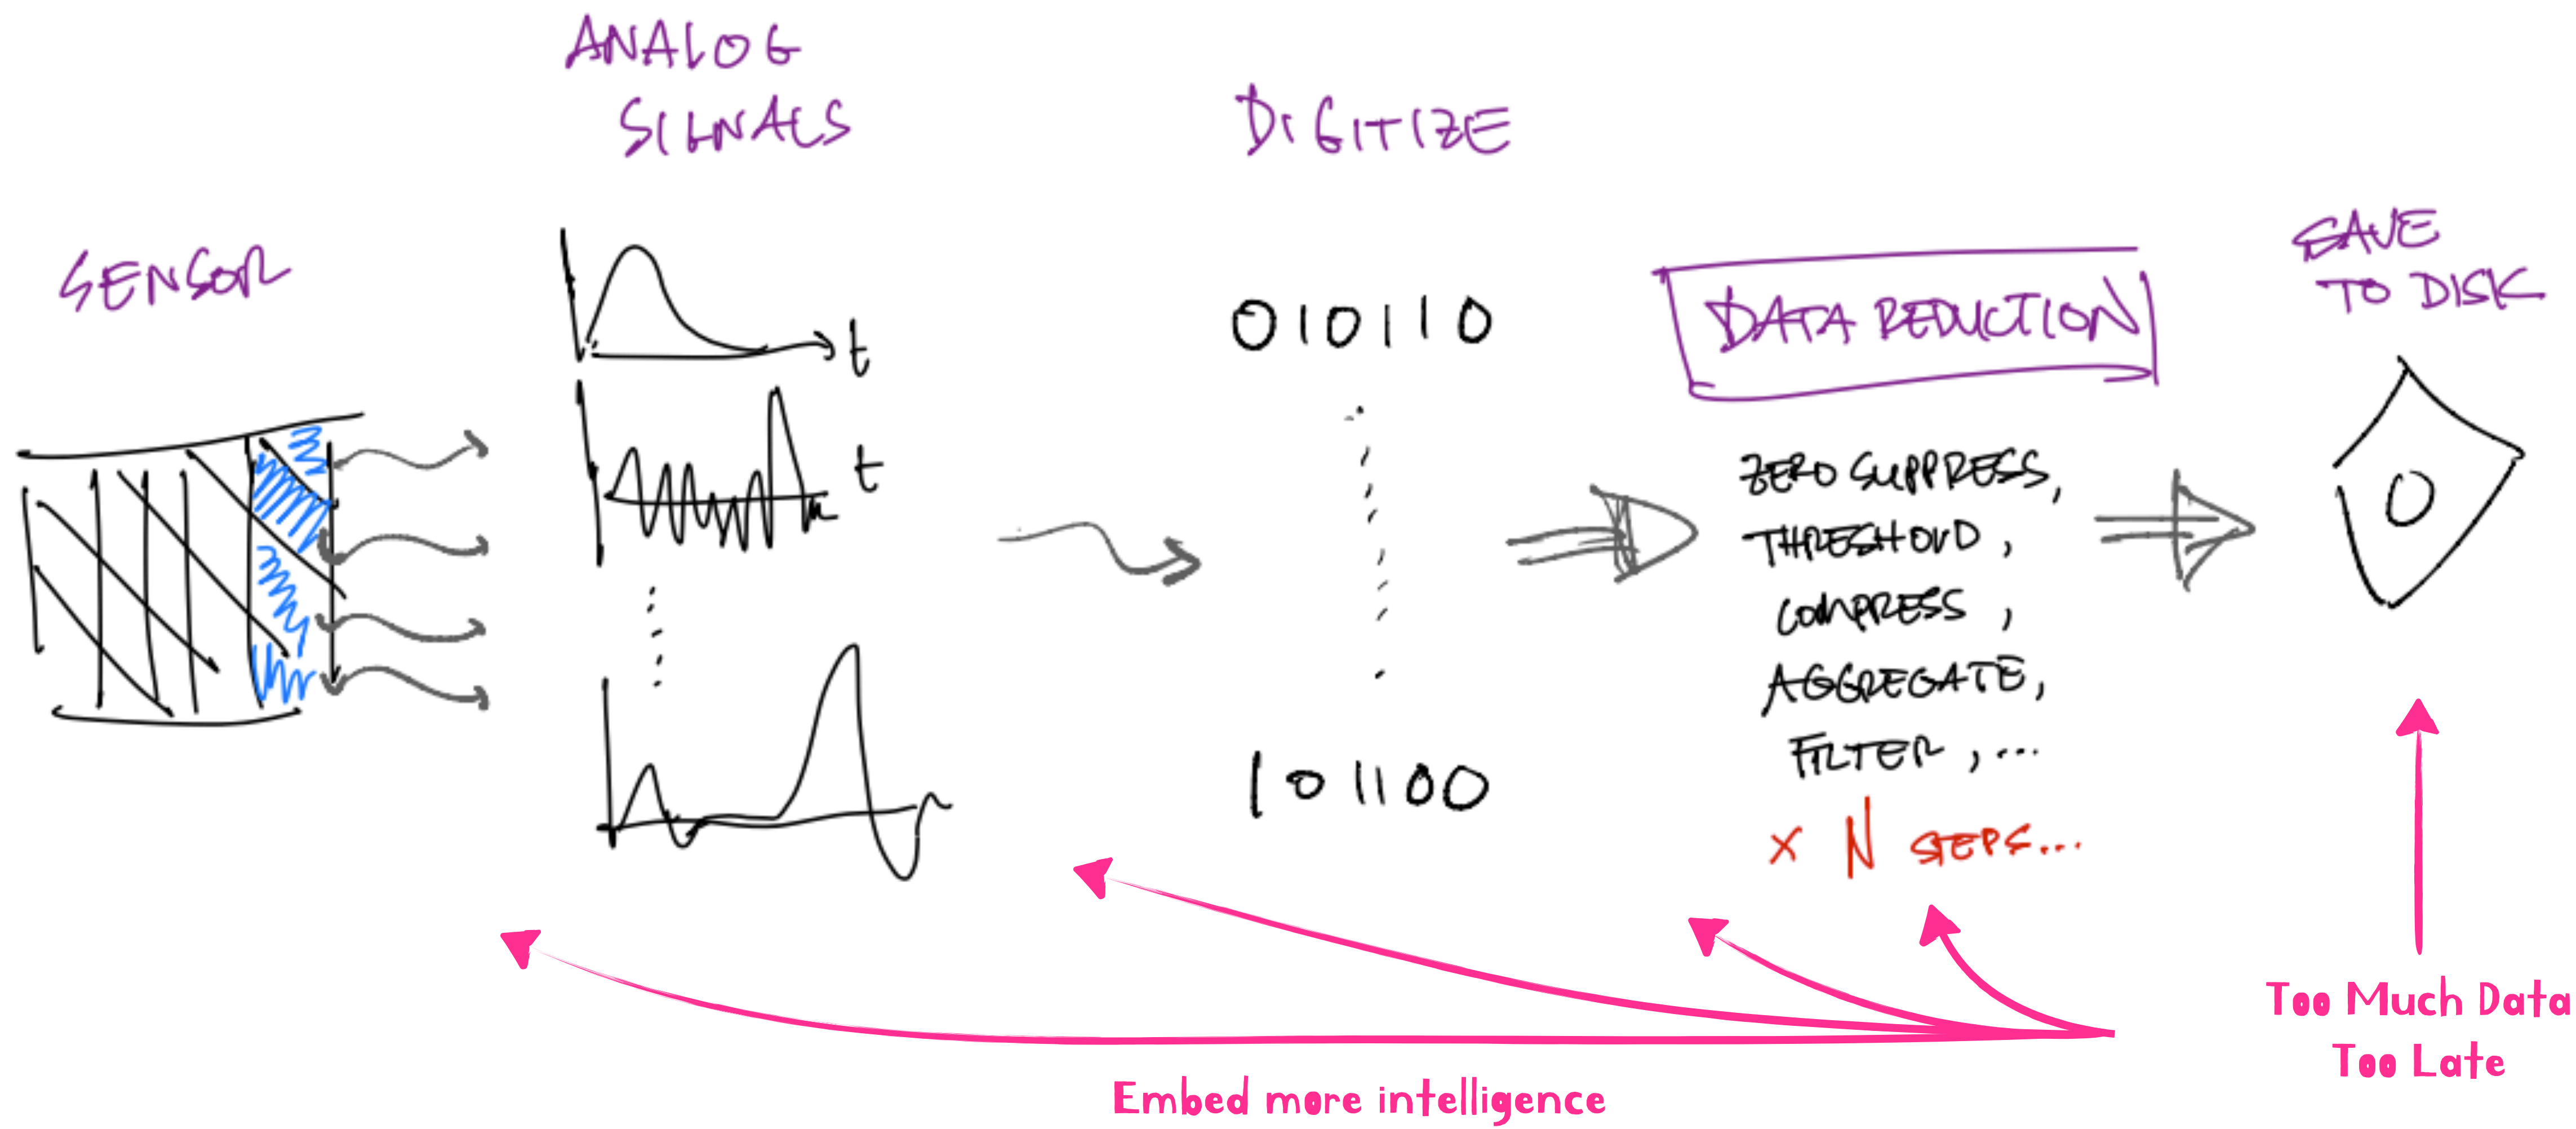

1 channel ~ 10b  
 1 channel, 1 MHz rate ~ 10 Mb/s  
 100k channels, 1 MHz rate ~ 1 Tb/s

1 channel ~ 10b  
 1 channel, 1 MHz rate ~ 10 Mb/s  
 100k channels, 1 MHz rate ~ 1 Tb/s

Too Much Data  
 Too Late
