

Self-Introduction & T2K experiment

- My name is Kotaro Indo (印藤 孝太朗) from Japan.
- I am currently a first-year master's student at Kyoto University
 - I am working on the development of a new detector for the T2K experiment.

T2K

- About the T2K experiment
 - A neutrino beam is produced at J-PARC and sent to the Super-Kamiokande detector.
 - The goal is to measure the neutrino oscillation probability.

Academic Background & Hometown

● Academic Background

- I completed my undergraduate studies at Kyoto University
- My bachelor's thesis was titled: “*Measurement of the Neutrino Cross Section Using Cherenkov Light.*”

● Hometown

- I am from Nara Prefecture and graduated from Nara High School.
- Nara is well known for its deer, which roam freely around the city.

Hobbies & Closing

- About my hobby
 - fishing, skiing, and cycling...

← These are albacore tunas.
I was very happy!, but they broke my fishing tools..
Fishing feels like a fighting sport to me.

skiing

cycling

I am glad to join Vietnam School on Neutrinos!
